Hard Body Armor Plates

STRIKE FACE

Protection That Lasts A Lifetime
By Thorax International s.r.o.

Thorax Performance Hard Body Armor Plates

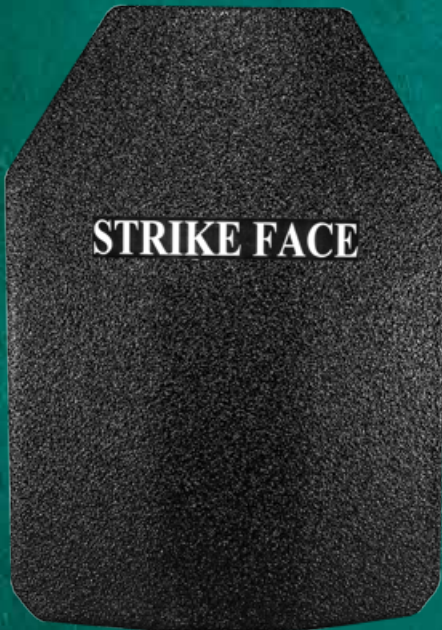

Thorax Performance hard armor steel plates are developed to defeat the threat of high-velocity ammunitions, including hand and rifle gun fire. These hard armor plates are designed to be comfortable and give you as much freedom of movement as possible while offering maximal coverage of protection.

Our body armor plates are manufactured to the **highest quality and tested to meet and exceed National Institute of Justice (NIJ)** requirements.

Designed in different shapes and sizes, manufactured from first-class materials, they ensure the highest quality. Unlike some ceramic or polyethylene material, our ballistics steel panels are able to **take several hits from serious rounds without a single fail.**

After striking an armored plate, a projectile will spall into deadly shrapnel that can cause further injury. All our **steel plates are treated with high-performance polyurea coating** which allows the bullet to penetrate the coating but as the bullet hits the armor and spalls, the coating encapsulates the fragments, which will remain trapped in the coating material, posing no secondary damage.

Special coating also provides a maintenance-free shelf life of several years, which makes this steel plate last much longer than polyethylene or ceramic alternatives.

Edge-To-Edge Protection With Multi-hit Capabilities

Designed for law enforcement, security and prepared citizens

**Minimal backface
deformation**

**Proudly
Made In
Czech
Republic.**

Designed to be comfortable while offering maximum coverage of protection.

Model Thorax Performance

Protection level:	NIJ III+
Type:	Stand Alone
Size:	250 x 300 / 10" x 12"
Shape:	Double lineary curved
Composition:	Balistics Steel
Protect form:	7,62 x 51 FMJ (M80) 7,62 x 39 Lead Core 7,62 x 54R 5.56 x 45 mm (M193)
Outer Shell:	Polyurea Coating

Available in different shapes and sizes. Manufactured from first-class materials.
