

MILPO - SPECIAL TRAILERS FOR AIRDROP

Description

MILPO is the one axle special off-road trailer design to be airdropped from planes on the airdrop platform type PDS V 108" 12 ft. (two trailers together).

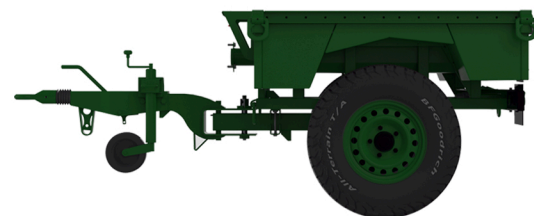

MILPO is structurally adapted for transport by sea, rail and air on board C-130 Hercules, C295M CASA aircraft (after folding the driver's cage), on helicopters decks or attached under helicopters.

Cargo platform is made from aluminum and equipped in transport holders and side boxes for equipment. There is a large, closed cargo space under the loading platform for folding ramps or off-road equipment. The trailer drawbar is folded to the side to limit the length.

Trailer is compatible with AERO vehicle: coupling, connector, wheels size, type and tread, cargo platform size, self-loading kit.

On special request can be equipped in:

- ▶ set of flexible drop sides;
- ▶ tarpaulin with a frame;
- ▶ self-loading kit;
- ▶ special modules (e.g. workshop, tank, generators, air compressors).

TECHNICAL DATA

Dimensions and weight

Length:	2870 mm
Width:	2005 mm
Height:	1150 mm
Cargo platform:	1400x1920 mm
Curb weight:	750 kg
GVM:	1600 kg
Load capacity:	800 kg

Suspension, brakes and wheels

Suspension:	Independent, trailing arms
Tires:	Tubeless 255/85/R16 Bf Goodrich
Brakes:	Mechanical drum, parking brake
Drawbar eye:	fi 70/40 mm NATO STANAG 4101

Electricity

Voltage:	12V
Connector vehicle-trailer:	13 PIN NATO standard
Lighting:	Bulbs, Black out NATO standard

*Trailer with workshop
and rescue module for AERO vehicles*

*Trailer prepared for airdrop on
airdrop platform type PDS V 108" 12 ft*
