

UniCage Gun Platform

A part of RADS (Rapid Adapt and Deploy System)

Identify. Adapt. Deploy.

RADS

RADS – Flexible Vehicle System

RADS (Rapid Adapt and Deploy System) is a Norwegian developed patented, modular platform that allows rapid transformation of light vehicles into operational support units. RADS solutions utilizes the DockLock quick attachment system, allowing for quick setup and vehicle interchangeability.

- **Quick Attachment:** Uses the DockLock base, enabling modular components to be added or removed in minutes without permanent modifications to the vehicle.
- **Compatibility:** Integrates across commercial and military vehicles, from pickups to ATVs.
- **Eco-Friendly:** Detachability and modular design reduce fuel consumption and vehicle wear while extending utility across multiple missions.

Mounting the system to the vehicle – and off again

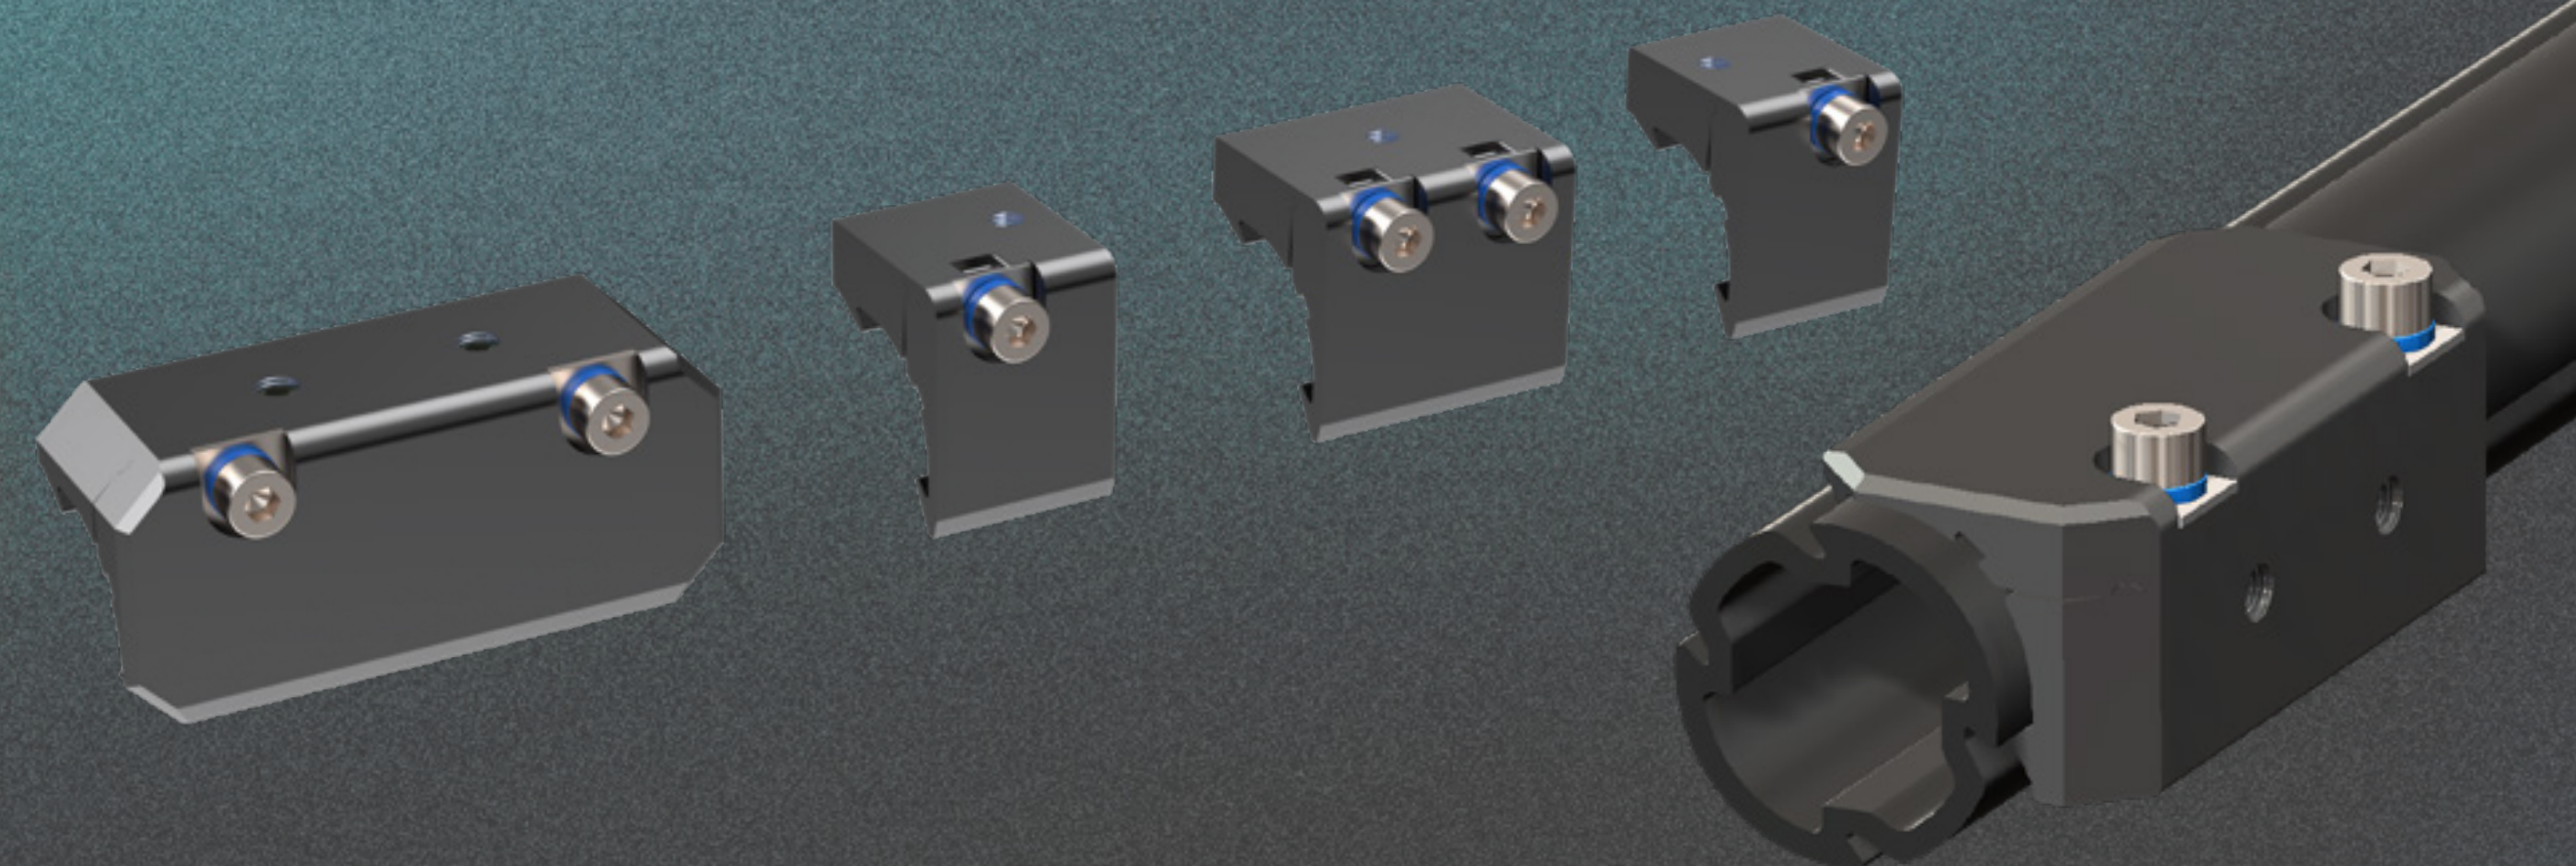

The patented DockLock system provides a non-permanent mounting and dismounting of the RADS-solution to the vehicle loading platform, without harming the construction. The DockLock integrates to the vehicle in 1-3 hours.

Robust Equipment Attachment

ArxLock is a highly durable grip track built into STORM's modular systems, allowing secure attachment of various equipment. Its strength enables entire RADS units to be lifted off vehicles using lift brackets mounted directly in the track. ArxLock also works with DockLock to keep modules firmly secured, even in tough conditions.

Examples of external equipment:

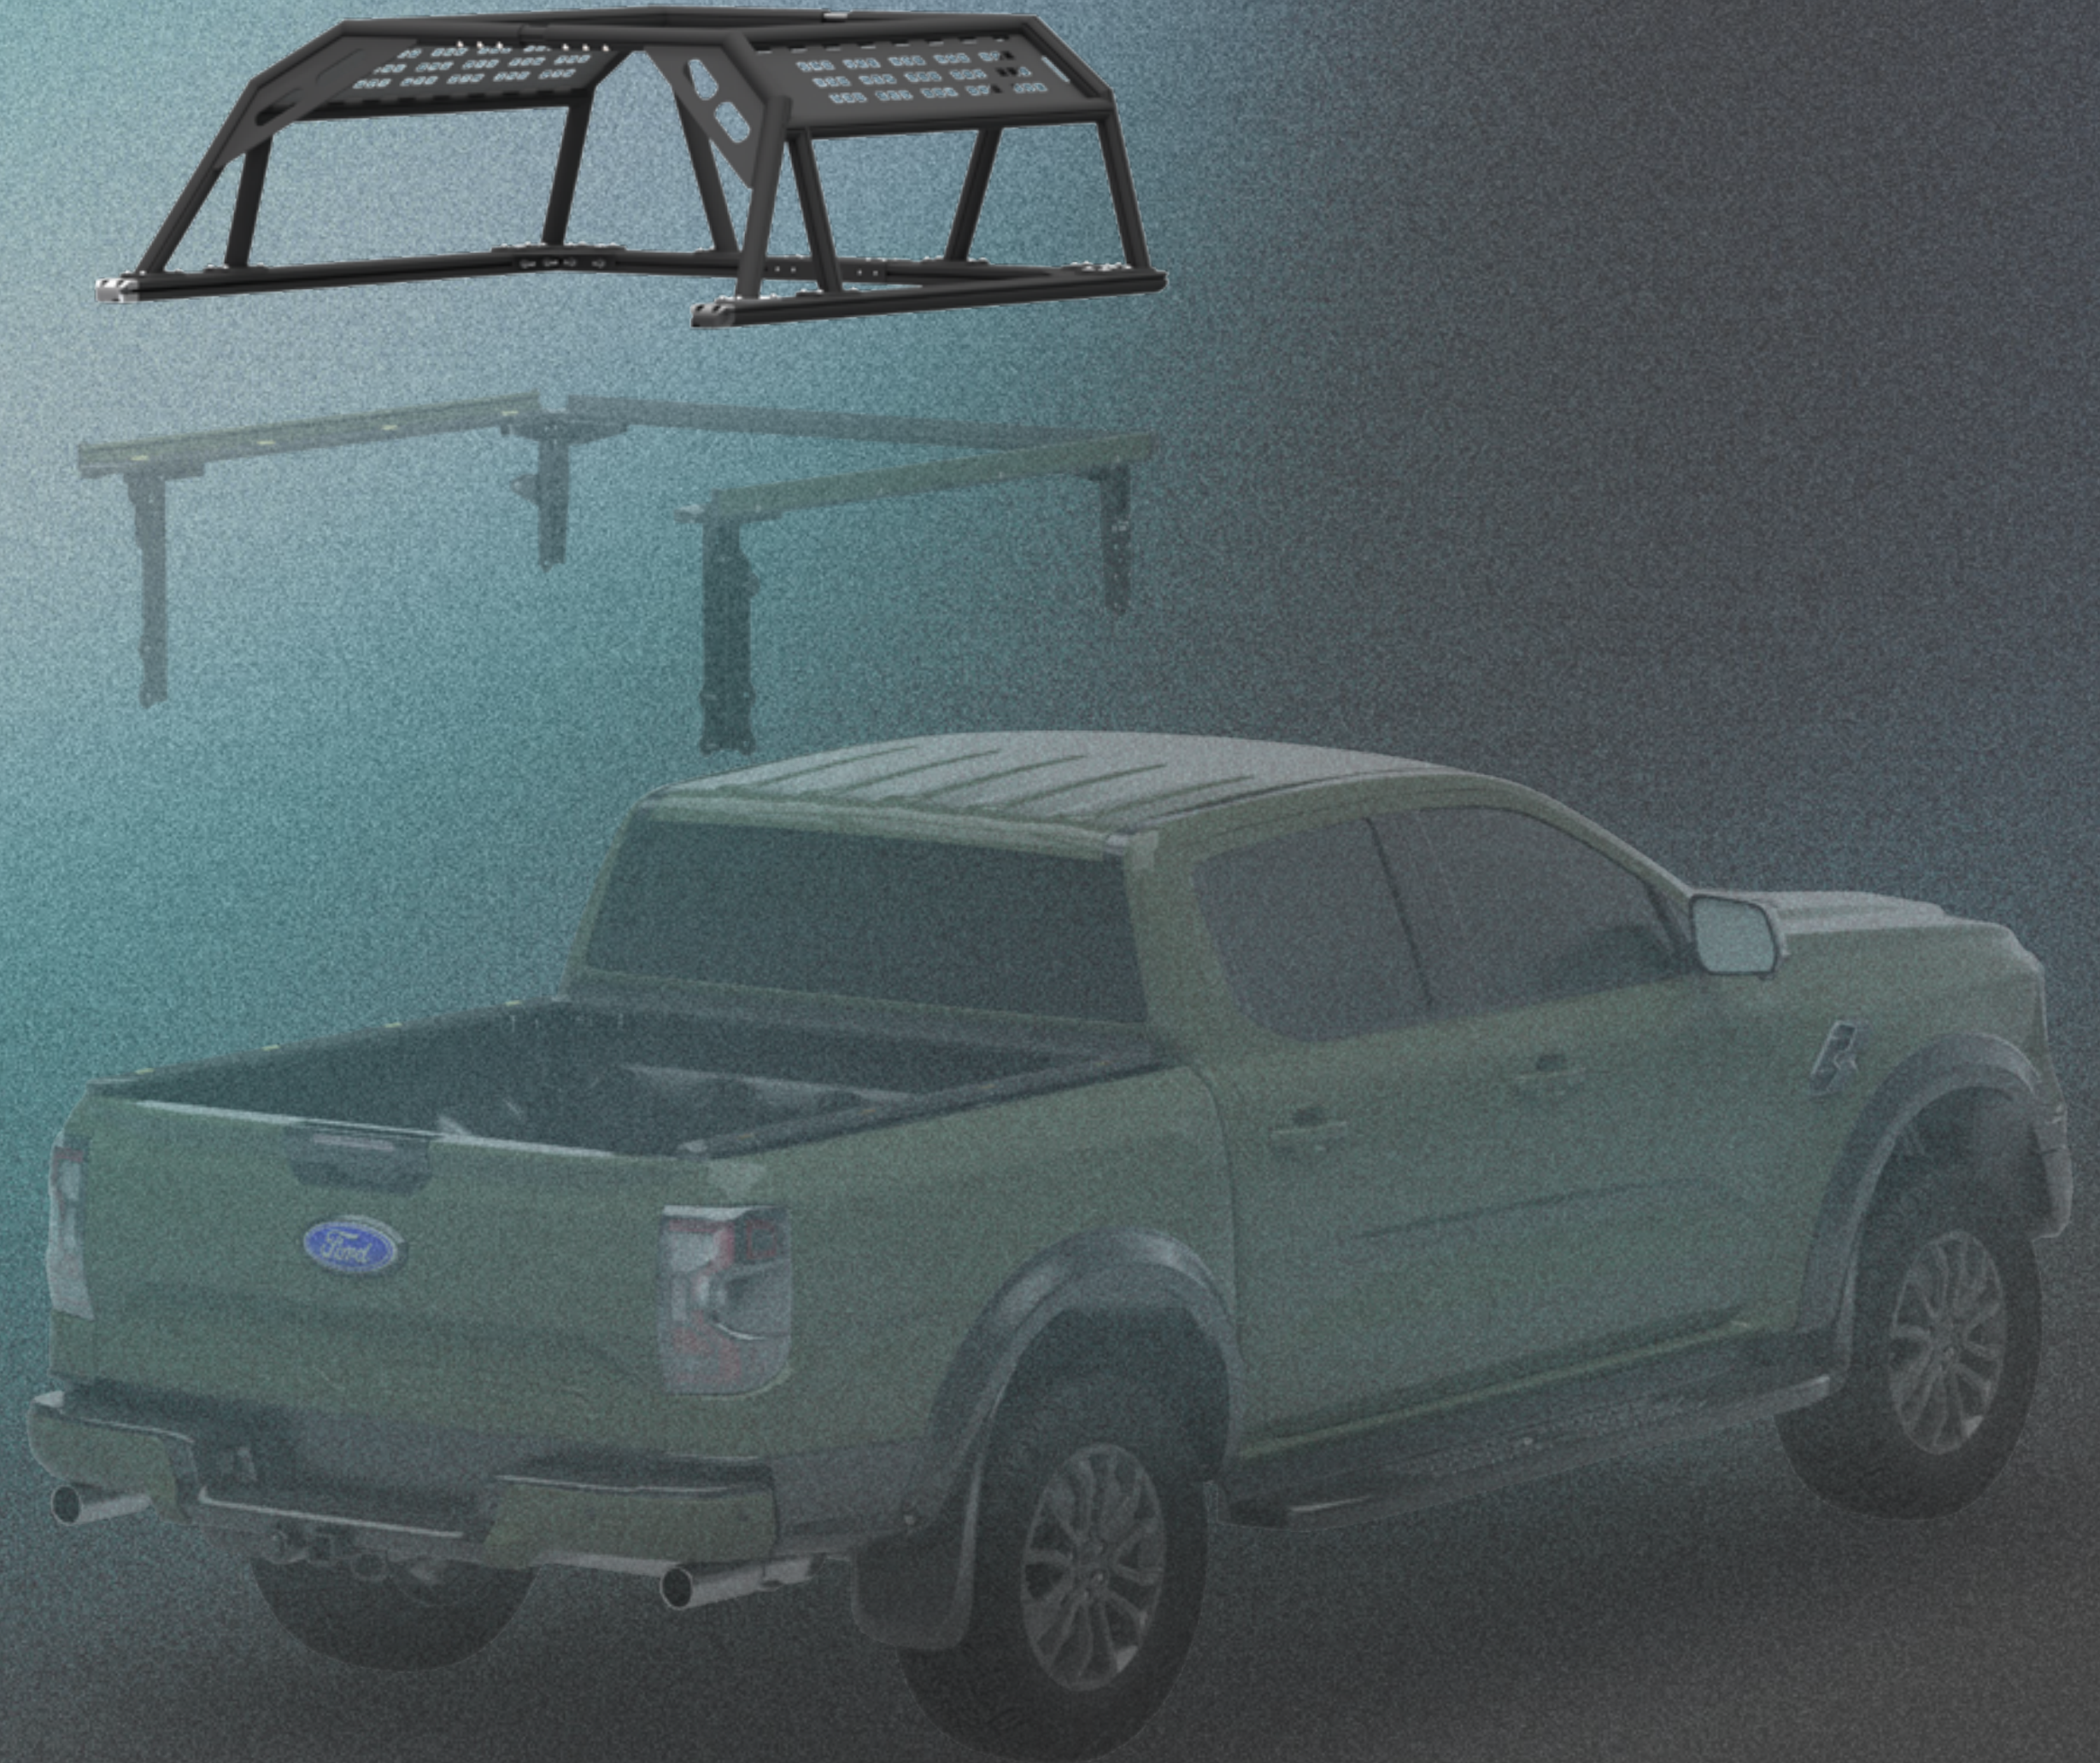

- Roof Brackets
- Antenna mounts
- Lifting brackets
- Loading bars
- Skate mounts
- Remote Weapon Systems
- Awnings
- Roof tents

UniCage – Universal Equipment Carrier

Mount seamlessly to the Dual ArxLock-gripping tracks, and keep adding to your preferred setup for each individual mission. UniCage is a robust and adaptable system designed for versatile military applications. As part of RADS, the mission modules support a wide range of operational uses and mounts on pickups without altering the vehicle's structure.

- **Easy Setup:** Quick mounting and dismounting using the ArxLock and DockLock systems.
- **Wide Application Range:** Supports everything from logistics storage to surveillance equipment and weapon platforms ensuring readiness for diverse missions.
- **Durability:** Built from high-strength materials for sustained use in harsh environments.

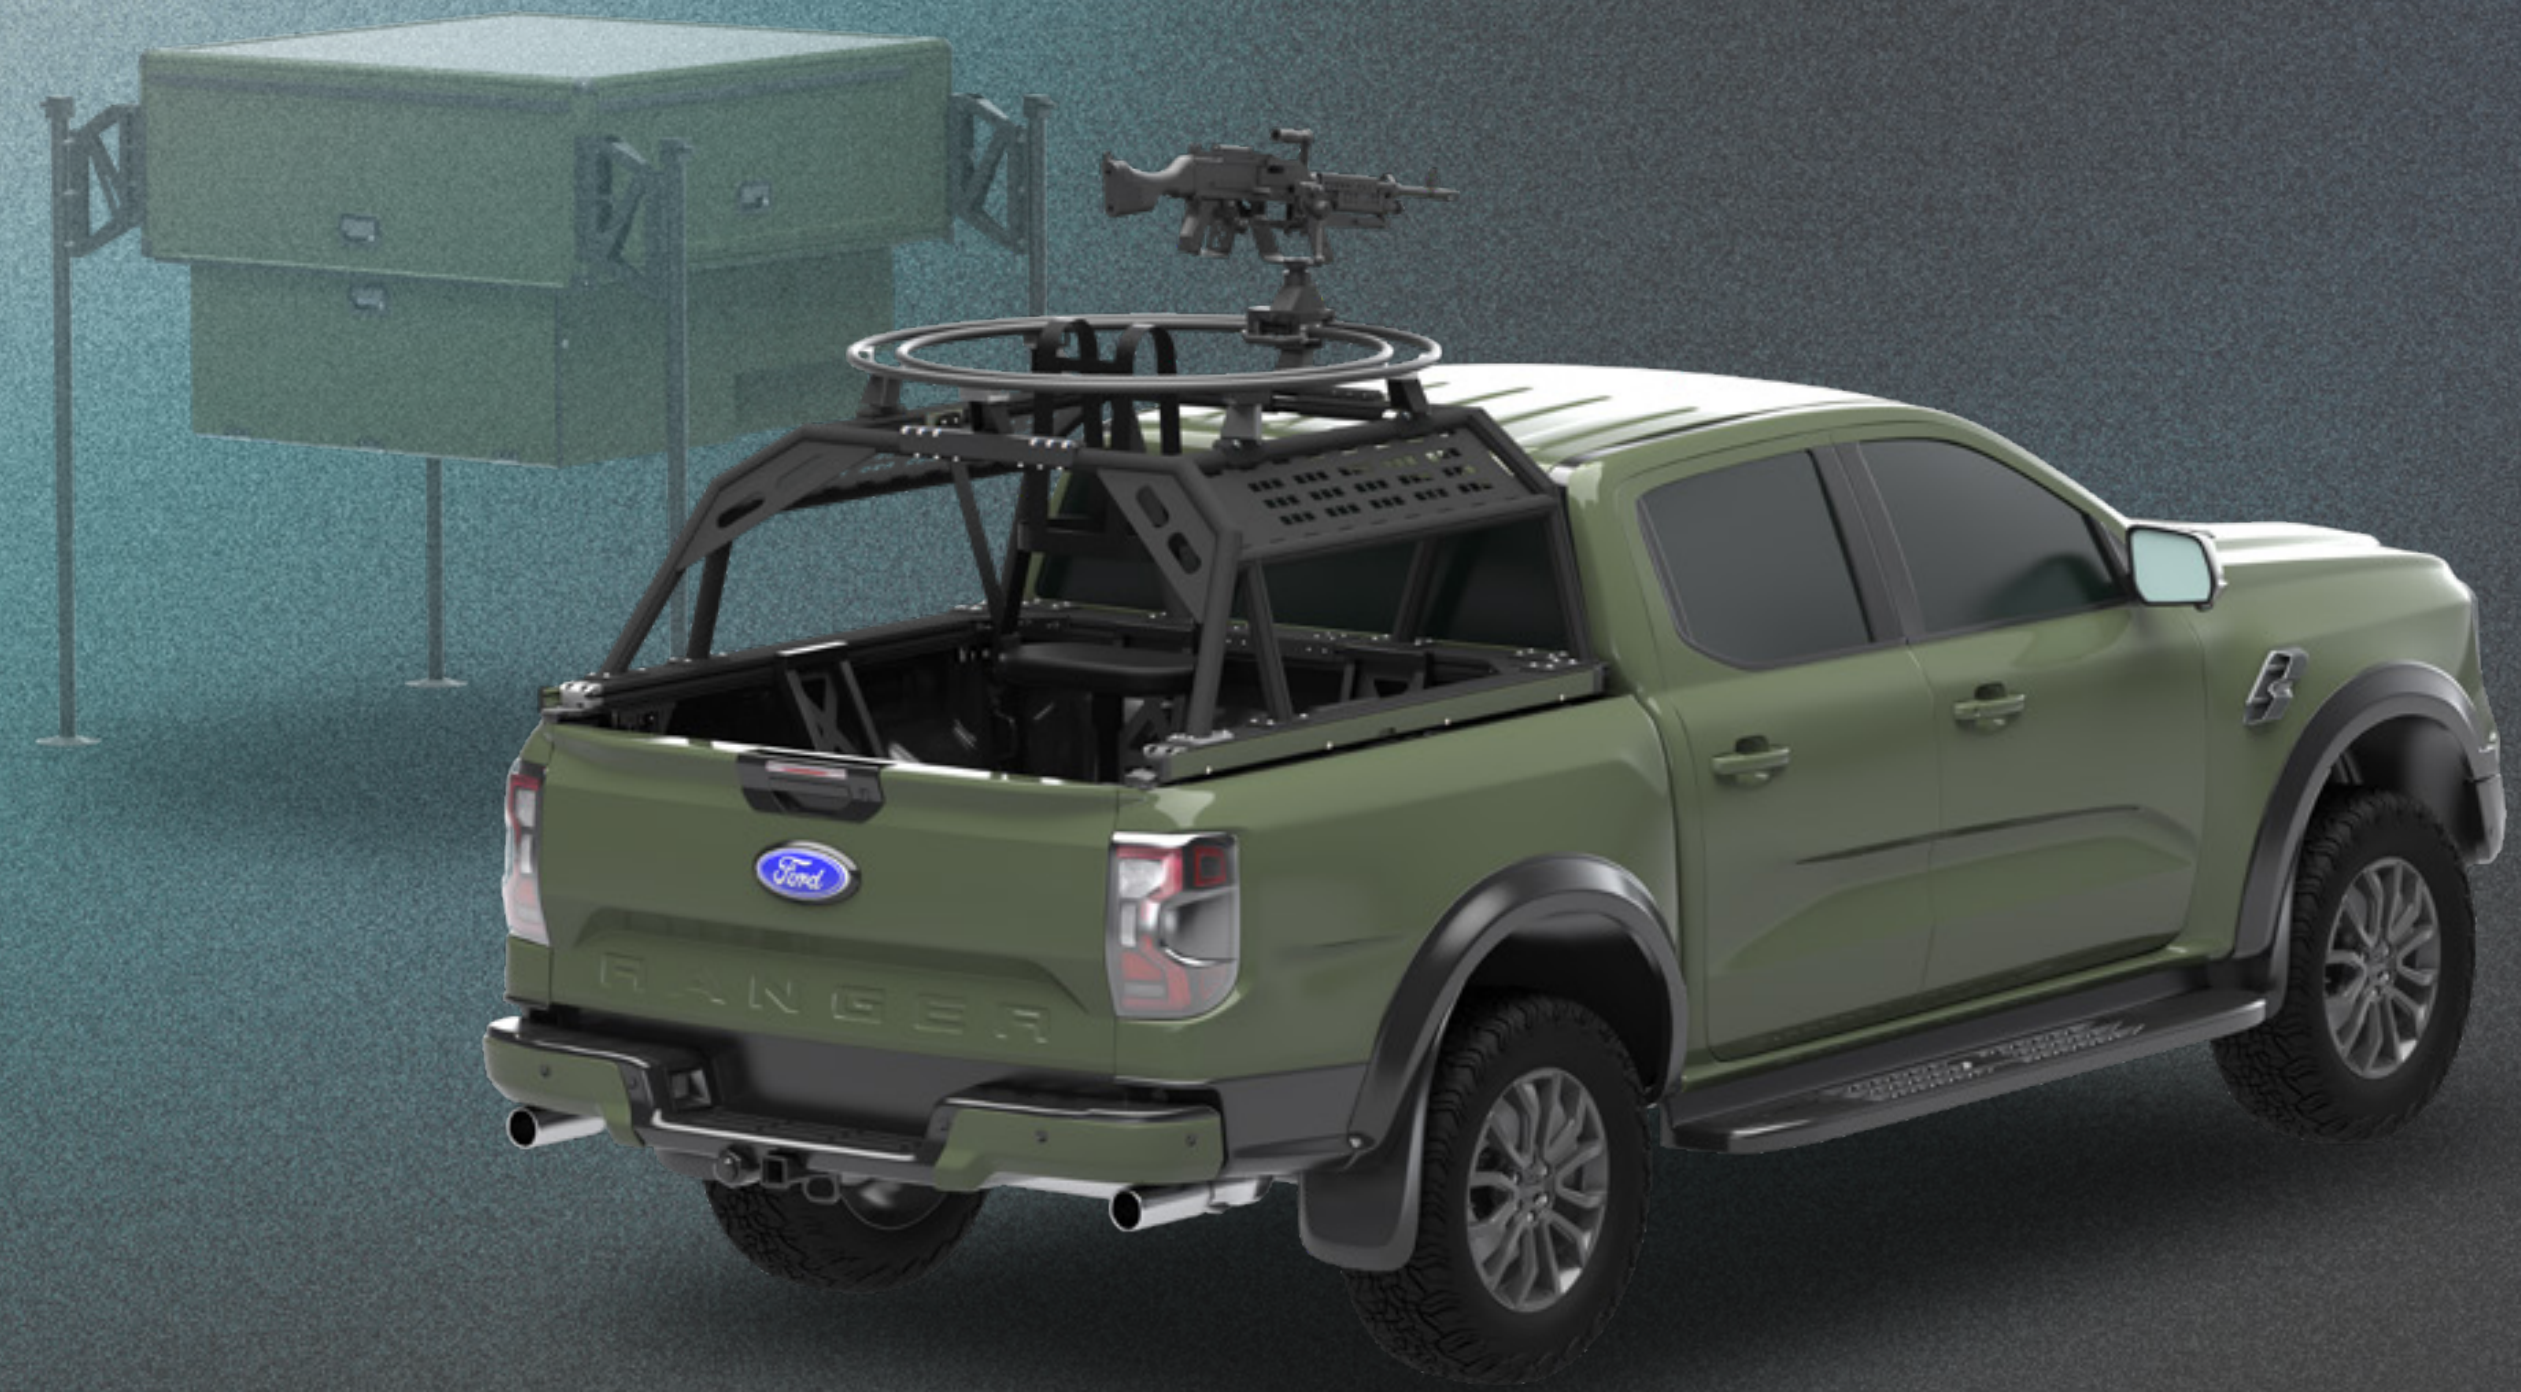

UniCage Weapon Platform – Tactical Superiority on Pickups

Configured as a weapon platform, UniCage transforms any compatible pickup into a mission-ready tactical vehicle. Designed to support various heavy-caliber mounts, it is ideal for defense, tactical response, and quick mobilization. Only when you need it!

Key Features:

- **High-Caliber Weaponry:** Supports up to .50 caliber mounts, including swing, skate, ring and turret mounts for heavy firepower.
- **Weapon Systems:** Configurable with diverse weapon setups, and heavy equipment.
- **Communication & Tactical Equipment:** Secure mounting for antennas, communication devices, and satellite equipment.
- **Additional Tactical Gear:** Ballistic shields, ammo- and barrel storage.
- **Operational Flexibility:** Attachable without permanent modifications, allowing for quick setup in response to mission needs.
- **Stealth Options:** Available in NIR stealth coatings for covert operations, reducing visibility in tactical scenarios.
- **Cost-Efficiency:** Enables a single vehicle to perform multiple functions, reducing the need for a dedicated fleet and lowering operational costs.

Adapt to Any Mission with a Single Platform

The UniCage system, through its modular capabilities, allows for rapid transformation, adapting pickups into effective tactical vehicles in any combat environment. Designed with military-grade materials, UniCage can support various mission-specific add-ons.

- **Easy Transitioning Between Missions:** Quickly convert DockLock-equipped vehicles from logistics to combat with minimal setup time.
- **Only one operator is needed:** With just a single operator, the system can switch between various modules in minutes, adapting seamlessly to meet diverse mission requirements.
- **Cross-Platform Compatibility:** The UniCage is adjustable allowing it to be used across different vehicle types, from pickups to trailers, ensuring full fleet integration without the need for multiple dedicated vehicles.

Quick Setup and Tear-Down for Mission Agility

With the DockLock attachment system, UniCage can be rapidly deployed or removed without impacting the base vehicle, allowing field teams to adapt to changing missions quickly, and utilize non-military vehicles with UniCage when needed.

- **Easy Installation:** Simplifies the attachment process to minutes, minimizing setup times in the field.
- **Non-Permanent Modifications:** Vehicle integrity remains intact, maximizing vehicle resale value and reducing conversion costs.
- **Cost-Effective Reusability:** One platform can serve multiple purposes, reducing the need for extensive vehicle fleets.
- **Use local and civilian vehicles:** Integrate DockLock to local or civilian vehicles. The vehicle is mission ready within 1-3 hours. Attach and detach UniCage in minutes.

Accessory Options

UniCage supports a broad range of options, allowing military teams to customize loadouts for specific mission needs quickly and effectively.

Accessory Examples:

- **NIR Coating:** Cerakote's robust NIR system reduces visibility in tactical environments.
- **Gun Mount:** Multiple weapon mount options available for integration with UniCage, with integration included in the UniCage purchase.
- **Enhanced Gunner's Restraint System (EGSR):** Several restraint system options available for integration with UniCage.
- **Barrel Holders and Cases:** Weather-resistant, durable barrel cases attachable via the ArxLock grip track.
- **Ballistic Plates:** Lightweight composite panels attachable with ArxLock brackets, resistant to up to 7.62 caliber bursts.
- **Ammunition Box Brackets:** Allows for convenient storage and access to ammunition during operations.
- Anti-tank weapon Integration Brackets
- **Adjustable UniCage Base for Gunner Platform:** Allows for rapid height adjustment for operators.
- **Universal Brackets:** Robust ArxLock grip track allows for mounting various equipment.
- Tarp/Cover Solutions
- Integration Solutions for Customer-Selected Weapon Mounts
- **Lifting Legs:** Facilitates easy deployment and detachment from vehicles.
- **Additional DockLock Set:** Enables compatibility across multiple vehicles.
