**COMBAT
AND TACTICAL
TRAINING**

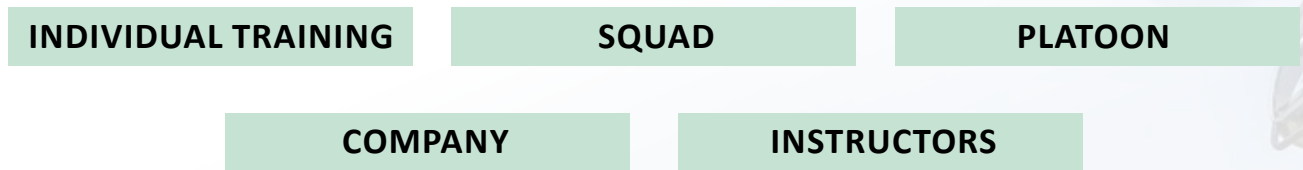

FOR MILITARY & LAW ENFORCEMENT

Through identification of threats and assessment of current capabilities we provide training programs, training infrastructure, suitable equipment and other necessary measures in order to achieve the required level of skills to meet all operational challenges and high level of combat effectiveness and readiness.

TRAINING COURSES RANGE / SCOPE

TRAINING PROGRAMS

TACTICAL SHOOTING TRAINING COURSES

PISTOL, ASSAULT RIFLE AND SMG SHOOTING AND WEAPON HANDLING

All courses are intended to teach basic to very advanced weapon handling and shooting techniques with a handgun, assault rifle or SMG. This course will enhance and improve basic shooting skills, habits and techniques necessary for the safe weapon handling.

TACTICAL SHOTGUN

Weapon handling and shooting with the tactical pump-action or semi-auto shotgun.

SNIPER

This course will cover all from basic sniper fundamentals and shooting techniques right through to very precise and difficult shooting positions and long ranges using specific military and urban procedure.

NVGTAC (Night Vision Tactics)

NVGTAC course is a shooting and tactically focused class on shooting and movement in CQB using squad level tactics in wooded and open terrain using night vision devices.

LOW LIGHT

On this course you will learn tactical movements and advanced shooting techniques with the pistol and rifle fitted with a flashlight in poor light conditions.

SHOOTING INSTRUCTOR

This is an exclusive and very intensive shooting class for future or active shooting instructors who have already passed all basic and advanced shooting courses.

POLICE TRAINING PROGRAMS

CLOSE PROTECTION & PERSONAL A SECURITY DETAIL

This Close Protection Course focuses on teaching the skills needed to perform your duty as a bodyguard or close protection operator according to EU/ USA standards. The Personnel Security Detail course will teach trainees the skills needed to perform as a security contractor in the Middle East and African countries.

ACTIVE SHOOTER

The Active Shooter course is a dynamic, hands-on training program designed to equip law enforcement officers and military operators with the knowledge and skills required to successfully eliminate an active threat. This course will prepare trainees to employ an active shooter through dynamic, interactive drills and scenario-based training.

ANTI RIOT

This is a special course designed for all police units that are deployed to deal with any kind of riot or civil unrest in urban areas or open spaces. It will teach trainees all the necessary modern police anti-riot techniques.

MILITARY TRAINING PROGRAMS

FIBUA (Fighting in Built-Up Areas)

This course is designed to teach the fundamentals of tactical movement and combat in urban areas.

SUT (Small Unit Tactics), **SUT ADVANCED**, **TACTICAL CONVOY OPERATIONS AND SPEED BOAT**

The Small Unit Tactics Course is designed to teach the team and squad level tactics in wooded and open terrain during tactical operations, tactical convoy operations and speed boats, including creating Observation Posts (OP's) and recon posts. Vehicle element, tactics in different terrain during tactical operations. Permanent 360° security, staging activity, and response to enemy activity such as IED, ambush and small arms fire. The Speed Boat Course is based on Small Unit Tactical operations which starts and/or ends on the water.

VCQB (Vehicle Close Quarters Battle)

Vehicle CQB is an exclusive shooting and tactical class that will focus on positional shooting and how to fight tactically in and around vehicles.

SERE (Survival, Evasion, Resistance, Escape)

This course is focused on survival in the wilderness and behind the enemy lines, movement, resistance and escape from the hostile territory.

JTAC (Joint Terminal Attack Controller)

The JTAC course teaches how to direct military aircraft during combat operations. JTAC duties in a theatre of operation include communicating with aircraft, drone and helicopter pilots. This course enables personnel to provide air support for military units on the ground.

MDMP (Military Decision-Making Process)

Special training program for team leaders and 2IC of combat units in the field of planning and preparation to perform combat tasks. Precise command preparation and detailed planning of the mission for maximum execution efficiency.

MILITARY / POLICE TRAINING PROGRAMS

CQB (Close Quarters Battle), **CQB ADVANCED AND HOSTAGE RESCUE**

The CQB course is designed to teach the fundamentals of room entry and basic tactical movement inside buildings. CQB Advanced and Hostage Rescue courses will focus on teaching advanced tactics including window entry in buildings and the arrest of offenders. It will include how to rescue hostages in vehicles, on public transport (bus, train, aircraft) and in public buildings. Use of FX Simunition, CQT ammo, live ammo.

TACTICAL TRACKER

The Tactical Tracker course is a hands-on basic visual man tracking course that provides valuable tactical tracking knowledge.

TACTICAL & DEFENSIVE VEHICLE DRIVING

This course is intended to teach driving skills in a civilian and tactical environment.

BREACHING

This intensive course focuses on door, window and wall breaching entry methods by mechanical, hydraulic, ballistic and explosive techniques.

WATERBORNE & UNDERWATER OPERATIONS

Comprehensive training focused on the use of the water area to conduct combat operations, infill and exfill of combat element into the area of interest. In addition, providing shoreline protection, conducting open water (sea) operations, ship and oil rig interventions. In underwater operations, training focuses on combat diver training to depths of up to 60m with open and closed oxygen equipment. Pyrotechnic activities, placing of special charges and infiltration of the object or area of interest.

CBRN (Chemical, Biological, Radiological, Nuclear)

Detection, identification, protection and decontamination of chemical, biological, radiological or nuclear threats.

EOD (Explosive Ordnance Disposal)

The course is focused on the search and disposal of explosive devices and the prevention of their explosion.

UAS (Unmanned Aircraft System) **OPERATOR**

Training of pilots/operators of unmanned aerial vehicles is focused on perfect mastery of piloting and use of the drones according to its specific character and purpose.

MEDICAL COURSES

■ **CLS (Combat Life Saver) BASIC & ADVANCED**

Both these CLS medical courses are focused on teaching the extended emergency first aid in combat conditions standard. They are equivalent to official NATO standard CLS courses.

■ **TCCC (Tactical Combat Casualty Care)**

The Tactical Combat Casualty Care (TCCC) Basic and Advanced courses teach EMS practitioners and other pre-hospital providers how to respond to, and care for patients in a tactical environment. It is designed to decrease preventable casualties in a tactical situation.

■ **COMBAT MEDIC**

This program provides training in combat trauma management and tactical combat casualty care, so medics have the skills and confidence to effectively treat multi-system trauma patients who are combat wounded in hostile environments. The training covers the entire continuum of care, starting at the point of injury until evacuation to a surgical facility.

AIRBORNE

■ **AIR ASSAULT**

This course is designed to teach both teams and individual military and police operators the tactics and techniques needed for a helicopter insertion into a hostile and/or denied location. Utilizing Fast Rope, Rappelling and Rapid Deployment from a helicopter platform, the police or military operator is taught how to be directly deployed into an operational area.

■ **TACTICAL RAPPEL BASIC AND TACTICAL RAPPEL ADVANCED**

Tactical and operational – This course focuses on tactical rappelling and working on high elevation building. The aim of this Tactical Rappelling course is to provide law enforcement or military personnel assigned to SWAT or any tactical operational team the fundamentals and hands-on-training that will enhance their confidence and rappelling skills needed for this insertion/exfiltration option.

TRAIN-TO-TRAINERS

Advanced Course for individual specializations designed for the most capable trainees with a sufficient level of leadership. It provides future instructors with knowledge of complex professional and presentation skills, enabling them to prepare, conduct, and evaluate training in specific specializations. The module focuses on mastering the subject matter and methodological procedures to refine instructors so that they can independently lead training programs in the future.
